## Research Paper Grading Rubric

Components	Outstanding	Good	Average	Below Average
Title 4 points	Is descriptive of question and work performed     Includes dependent variable, independent variable and organism studied	<ul> <li>Gives a general description of question and work performed</li> <li>Missing one of the following: dependent variable, independent variable and organism studied</li> </ul>	Is present     Missing two of the following: dependent variable, independent variable and organism studied	Not present
Abstract 10 points	States clearly question being asked     Gives hypothesis being tested     Highlights most important findings with enough information to understand experiments     States major findings and conclusions     Is a concise summary of question and findings	<ul> <li>Is missing one component of good abstract</li> <li>Abstract is not well organized or concise.</li> </ul>	Is missing two components of a good abstract     Does not give an overview that leads directly to the reader being able to state the major findings of the study	Is missing three or more components of a good abstract     Is not written in a scientific style     Includes references in abstract
Introduction 24 points	<ul> <li>Demonstrates that student has outstanding understanding of the research subject matter</li> <li>Provides the reader with the necessary information to understand the present study</li> <li>Piques the readers interest and makes the importance of the question real</li> <li>Gives appropriate information to previous studies that has an impact on the current study</li> <li>Does not contain superfluous information and/or is not wordy</li> <li>Gives a description of the specific purpose of the study, a description of the hypothesis being tested and a brief summary of the experimental strategy being used at the end of the introduction</li> <li>Gives a description of the study system and why it is appropriate to use it to answer hypothesis</li> </ul>	Demonstrates that student has good understanding of the research subject matter     Contains some superfluous information     Does not pique the interest of the reader     Is missing some needed background information     Gives too much information-more like a summary     Has all the components of a good introduction but some parts may be difficult to understand     Gives a description of the study system with some comment on its appropriate use	Demonstrates that student has average understanding of the research subject matter     Is missing one or two components of a good introduction     Contains significant superfluous information     Gives a description of the study system	Does not demonstrate that student has an average understanding of the research subject matter     Is missing needed information to understand the present study or is     Is missing a description of the specific purpose of the study, a description of the hypothesis being tested and a brief summary of the experimental strategy being used at the end of the introduction     Contains no information about the study system
Materials and Methods 12 points	Describes how the experiment was performed with sufficient detail to enable another scientist to repeat the experiment and obtain the same results     Presents easy-to-follow steps which are logical and adequately detailed without including standard procedures that all scientist know how to do	Describes how the experiment was performed with sufficient detail to enable another scientist to repeat the experiment and obtain the same results     Most steps are understandable but some lack detail or are confusing	Describes how the experiment was performed with some critical details are lacking     Most steps are understandable but some lack detail or are confusing	Is lacking several critical details so that it is impossible to repeat the experiments described     Many steps are missing in describing steps in an experiment

Components	Outstanding	Good	Average	Below Average
Results	All pertinent data is	All pertinent data is	Most pertinent data is	Raw unprocessed data is
16 points	described	described	described	present
	<ul> <li>Raw unprocessed data is absent</li> <li>Results presented as both narrative text and in figures and tables</li> <li>Data presented in a logical manner to enable the reader to draw conclusions</li> <li>Important data is highlighted</li> </ul>	<ul> <li>Raw unprocessed data is absent</li> <li>Most results presented as both narrative text and in figures and tables</li> <li>Most data presented in a logical manner to enable the reader to draw conclusions</li> <li>Most important data is</li> </ul>	Raw unprocessed data is absent     Most results presented as both narrative text and in figures and tables     Most data presented in a logical manner to enable the reader to draw conclusions     Most important data is	Some results presented as both narrative text and in figures and tables     Data not clearly presented     Important data not highlighted     Data in tables or figures not described in narrative form
	<ul> <li>No conclusions are present</li> <li>All tables and figures have appropriate legends</li> <li>All tables and figures are described in the narrative text</li> </ul>	<ul> <li>highlighted</li> <li>All tables and figures have appropriate legends</li> <li>All tables and figures are described in the narrative text</li> </ul>	<ul> <li>highlighted</li> <li>Most of the tables and figures have appropriate legends</li> <li>Most tables and figures are described in the narrative text</li> </ul>	
Discussion/ Conclusions 16 points	Question and hypothesis restated     Conclusions are stated clearly with explicit reference to the data that support a conclusion     Argument for conclusions well organized     Importance of conclusions discussed     Conclusions related to other studies and put into a context of current knowledge     Clear differentiation between speculations and conclusions     Final paragraph states the major finding of the study (the take home message)	Conclusions are stated clearly with explicit reference to the data that support a conclusion Argument for conclusions is generally well organized Importance of conclusions discussed Conclusions related to other studies and put into a context of current knowledge Final paragraph states the major finding of the study (the take home message)	Conclusions are stated clearly with reference to the data that support a conclusion     Argument for the conclusions can be understood but difficult to follow     Final paragraph states the major finding of the study (the take home message)	Conclusions are stated but without sufficient reference to the results that support it.     Lacking several of the characters of a good discussion
References 10 points	All cited sources present     No references not cited in the body present     In appropriate format     References all highly relevant	All cited sources present     In appropriate format     References relevant and appropriate	<ul> <li>Most cited sources present</li> <li>Generally in appropriate format</li> <li>References relevant and appropriate</li> </ul>	Many sources absent     Inappropriate format     References not most relevant/appropriate to study
Grammar and mechanics 8 points	Paragraphs well organized     Sections with logical organization of paragraphs (especially introduction, results and conclusions)     Few grammatical errors, typos and misspellings     Appropriate word selection     Correct use of scientific terms	Most paragraphs well organized     Sections with logical organization of paragraphs (especially introduction, results and conclusions)     Several grammatical errors, typos, and misspelling may be present     Some misappropriate word useage errors (effect vs. affect)     Some misuse of scientific terms	Many paragraphs well organized     Several grammatical errors, typos, and misspelling may be present	Paper lacks well organized paragraphs     Sections do not contain information presented in a logical order     Many grammatical errors     Many misappropriate word useage errors (e.g., effect vs. affect)     Many misuses of scientific terms
Overall Evaluation	80-100 points	66-79 points	40-65 points	0-39 points
